

# KINECTIMALS

To add a Burger King toy to the Kinectimals game:

Locate the Scan tag on the back of the Burger King insert.

Go to the Scan Stone in Fur Town. Hold the tag approximately 9 inches (23 cm) away from the Kinect™ Sensor.

Hold the tag, as shown above, in front of the Kinect Sensor for 3-5 seconds. [Make sure your fingers do not block the Tag and the Tag is not tilted during the scan. Avoid dark lighting conditions.]

You will hear a sound effect indicating that the sensor sees the tag, and a picture of the toy will appear.

“Accept” the toy that appears onscreen after the tag is scanned.

Resume play.

The next time you are able to access your Toy Box, you will see a new Burger King category where all of your scanned Burger King toys can be found.

Have fun playing  
with your cub with  
your new toy!
